Abstract

SkyToken (\$SKY) is the first of its kind Ethereum based ERC-20 charity token, created to work with Skypath Security. Skypath Security has developed a state of the art technology aimed towards securing schools, churches, event halls or any public space. The SkyToken Foundation utility/charity function will offer free access to Skypath Security's Mobile Defense Platform™. SkyToken Mobile Defense Grant Program will allow all qualified applicants up to 12 months of free access to Skypath Security's Mobile Defense Platform™.

Tokenomics

Name: SkyToken

Ticker: \$SKY

Total Supply: 42,500,000 Million

Decimals: 18

Contract Address: 0x9a2926af8504f33b0f004313df31b659efde4b80

Network: Ethereum (ERC-20 token)

Token Distribution

SkyToken (\$SKY) 42,500,000 - Total Tokens

*37,500,000 - To be sold during the token pre-sale.

→ 100% of the net proceeds after expenses and allocations will be allocated to the "SkyPath Mobile Defense Grant Program".

3,500,000 - Allocated during pre-sale to devs for Marketing, Partners and Promotion.

1,500,000 - Allocated to Liquidity Locks and Market Makers.

After the conclusion of the Skytoken pre-sale, a 501(c)3 exemption application will be filed. Once the 501(c)3 is granted and received, all SkyToken purchases will be retroactive to the purchase date. Therefore, purchasers who contribute during the pre-sale period will be able to deduct 100% of their purchase."

*SkyPath Security/SkyToken will allocate an amount, not to exceed 10 Million USD, as a form of compensation to the project developers. 5

Skypath Mobile Defense Grant Program

Participants will navigate to Skypath's Security website located at www.Skypath.com to apply for the "Skypath Mobile Defense Grant Program". The grant will include the installation of the Mobile App, complete facility or campus threat Assessment, monthly hosting, waived user access fees (cap to be determined), Interactive link with first responders and access to active shooter on-site training and training materials for up to 12 months. Furthermore, schools can re-apply to extend the grant after completion of its initial 12 month cycle.

Skypath Security™ certifies schools, retail stores, restaurants and public buildings or spaces against active shooters, public threats and hazards with its interactive mobile defense platform linked directly to first responders. We make public places SAFER!

Digital Drawings

For a limited time only, the top 500 SkyToken holders will be automatically entered into a bi-annual drawing for a chance to receive an exclusive limited edition Skypath Security digital certificate. The digital certificate will illustrate how many lives were protected by Skypath Security.

*The Digital Drawings are subject to change at the discretion of the SkyToken and Skypath Security. Digital Certificates do not hold any monetary value SkyToken holders are not obligated to participate.

7

Real World Application - Use Case

SkyToken was created as a charity function to work in conjunction with Skypath Security to give any public building the access to the tools they need to keep their occupants and first responders safe during any active threat. Skypath Security and SkyToken together will solve

the following problems.

Problem (1):

Statistics show most of all threat assessments are completed manually. This has led to a variety of threat assessment gaps, inefficiencies and inaccuracies in the information obtained and reviewed.

Solution (1):

Skypath Security™ has created, developed and completed a state of the art Mobilized Platform that allows clients and Threat Assessment Officers (“TAT”) the ability to enter and receive data and information digitally. Data and information can be inputted and accessed with the Mobile Defense

Platform on all Mobile platforms.

Problem (2):

Ensuring Safety of First Responders. Many times throughout the USA and abroad, first responders are called to duty, which includes entering buildings during threatful situations. Previously, public spaces had no other option than to rely on the original set of schematics/blueprints created during

initial construction.

Solution (2):

Skypath's Mobile Defense Platform has the ability to utilize a state of the art Schematic and Blueprint Technology to create digital plans/blueprints of public spaces, by uploading existing plans or by utilizing 3D Panoramic Photographic technologies to create live interactive 2D, 3D or BIM set of plans and models in which clients and First Responders will be able to view, update, and markup using any mobile device whether ONLINE or OFFLINE. Skypath is committed to the Safety of our First Responders and will be offering access to its cloud based Software Technology for Free.

9

Problem (3):

Safety of occupants throughout the USA and abroad during an active threat, (Active Shooters, Bomb Threats, Fire Hazards, Hurricanes etc.) vulnerable occupants become hostage to the threat. In most threats occupants are rushing out of the building to safety. However, in an Active shooter situation, the safest place to be is in a locked room. Many occupants are afraid to stay in the room fearing no

one will be able to find and save them and unfortunately end up running into harm's way.

Solution (3):

During an active shooter event teachers, administrators or employees can lock their room, take cover and use the Skypath Mobile Defense Platform and App™ on their phone to mark their room occupied and indicate the number of occupants in the room prior to first Responders arriving onsite. First Responders will be able to use their mobile device prior to making entry to locate current occupants in danger. This allows for safe and secure extractions eliminating the need to go room to room searching for individual occupants. **Skypath Saves Time and Lives!**

10

Problem (4):

In the event of an Active Threat Crisis the receipt of timely and accurate data and information is imperative. In most situations, First Responders receive information at the site when they roll out the plans on the hood of their vehicle or open surface then brief First Responders. However, this

takes up critical time. Having accurate data, information and plans and **Skypath Saves Time and Lives!**

Solution (4):

The Mobilized Platform will allow this process to start sooner once Certified Skypath buildings are linked to First Responders. First Responders will have access to the information on all mobile devices via Skypath's Mobilized Platform Cloud Based Software, increasing efficiency while increasing the number of **Lives Saved!**

Problem (5):

Due to upward trending growth in Active Threats, public buildings are finding the need to carry Active Threat Insurance due to increased liability in the loss of life or injury.

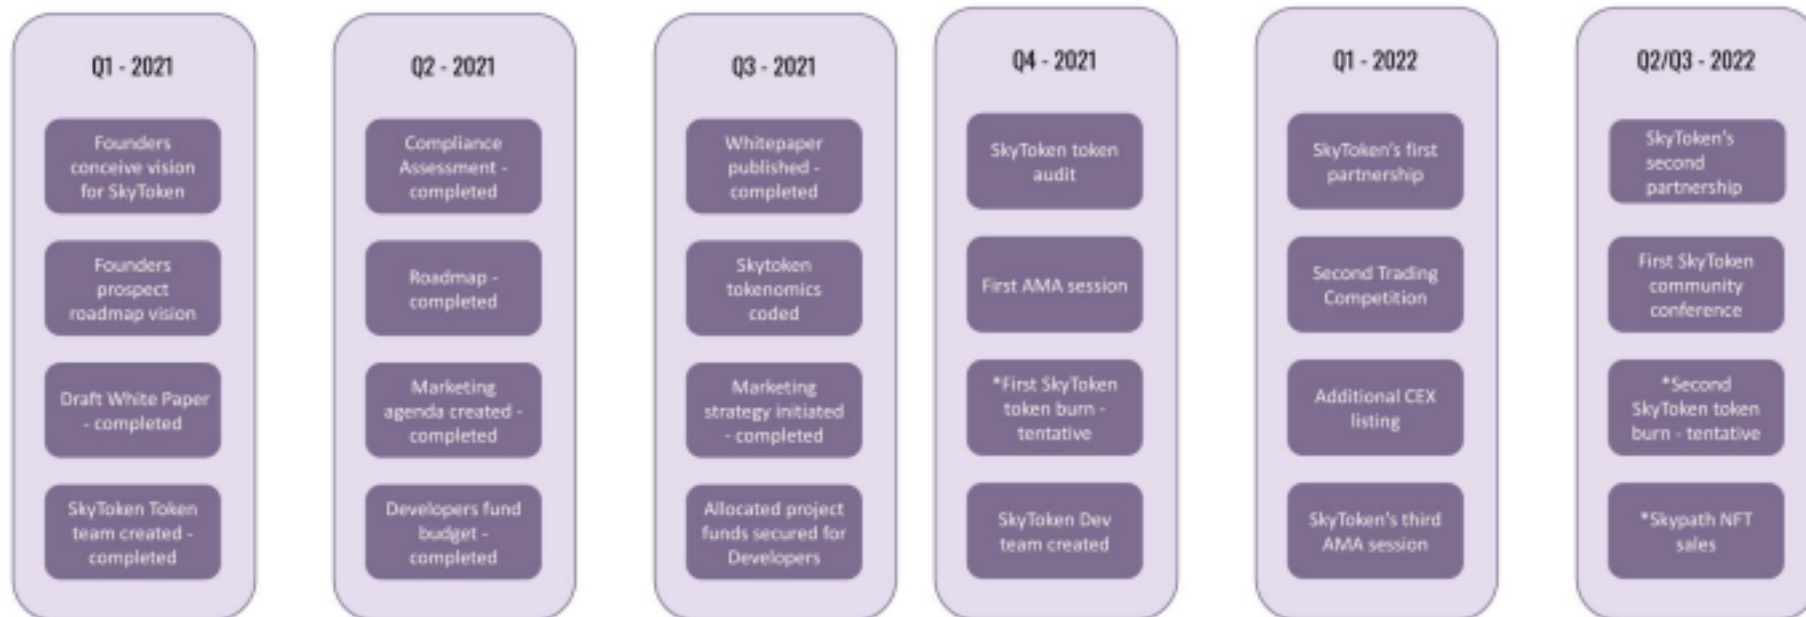

11

Solution (5):

Having a Certified Threat Assessment done by Skypath Security™ will benefit the insured by helping reduce insurance premiums provided by Insurance Companies. This reduction in premiums

could potentially cover the cost of installation and implementation of the Mobile Defense Platform.
